

Kestrel website announcement

February 2005 – Kestrel – ReSolution Partners Team launches endPoint service

Kestrel Management Services, LLC and ReSolution Partners announced today that they signed a teaming agreement to deliver environmental remediation management and site closure services at a guaranteed cost to industry.

Kestrel-ReSolution Partners employ innovative service delivery methodology which shortens the traditional remediation and site closure cycle thereby decreasing associated costs. Kestrel-ReSolution Partners operate with a lean business model utilizing a network of specialists and are in a position to offer reasonably priced environmental insurance when required.

Operating with a lean business model and delivering services at a guaranteed cost separate the Kestrel-ReSolution team from traditional consultant and contractor approaches to environmental remediation management and site closure.

Kestrel has successfully managed the process for site closure for more than 600 properties with site accruals exceeding \$500 million involving a full range of contamination issues.

The principals at ReSolution Partners have over 35 years of experience delivering technology applications to support environmental remediation, project, stakeholder, and business management experience, and successful track record of providing outstanding client service.
